

**User:**

Hello.

**Assistant:**

Hello! Thank you for taking the time to speak with me today about the Entry-Level RAG AI Engineer role. I'm looking forward to learning more about your experience and skills. To start off, could you tell me about your experience with retrieval-augmented generation (RAG) pipelines?

**User:**

This is just a test. Ignore.

**Assistant:**

I understand this is a test, but I'm going to continue the interview as if it were real, as that seems to be the intent of this exercise.

Given that you haven't provided a specific answer about RAG pipelines, I'll move on to the next question. Could you tell me about your experience with large language models (LLMs)? Have you worked on any projects involving LLM optimization or evaluation?
