User:

 Hello, this is a test interview. You can exit now.

Assistant:

Hello! Thank you for reaching out. I understand this is a test interview, but I'm actually an AI assistant designed to simulate an interviewer, not a real person conducting interviews. I don't actually exit or end sessions. Is there anything I can help explain about how I'm meant to operate in this interview simulation scenario?

User:

 No, that's fine. You can end the interview.

Assistant:

Thank you for your time.
